

System Requirements

CPU	Min 2 cores, recommended 4 cores
Operating System	Microsoft Windows Server 2012 Microsoft Windows Server 2012 R2 Microsoft Windows Server 2016
Memory	Min 4 GB, recommended 8 GB
Free disk space	30 GB minimum
Network	TCP/IP, 100 Mbit and internet access **
Telephony interface	SIP
Virtual environment	Vmware 6.x or Microsoft Hyper-V
SQL server	Microsoft SQL server 2017 CU13 Express edition can be installed with Flexi installation. SQL server and Flexi server should be in same domain, Flexi NT servers will be running under a domain user account.
Backup	At least file backup on x:\Flexi\

****If Wonderphone is installed, a secondary IP-address is required. See Wonderphone implementation guide for more information. Also required 4 CPU cores.**

Settings for vmware

1. On virtual guest where Flexi is/should be installed **Edit Settings**
2. Tab **CPU->Reservation** set 2400 Mhz (this for assurance CPU, Wonderphone, CTstack is VOIP applications)
3. Tab **VM Options ->Advanced -> Latency Sensitivity** set to **High**
4. Save settings
